PROJECTS

[E-Commerce Store with MERN Stack](#) [[User](#) | [Admin](#)]

This project is a full-featured e-commerce platform built using the MERN stack (MongoDB, Express.js, [React.js](#), [Node.js](#)). The platform provides a seamless shopping experience with essential features such as user authentication, product management, cart functionality, and a dynamic order-placing system. [Customers](#) can browse through products, add items to their cart, and place orders.

[E-Store Control](#) [[Git](#) | [Video](#)]

This project is an E-Store built using React, Bootstrap, and JSON server for data fetching. Challenges that I faced during this project from managing dynamic state updates to making sure UI components always display fresh data. The platform provides a seamless shopping experience. Customers can browse through products, add items to their cart, and place orders. Sellers can view their payments and orders, and Admin can see details about all users and sellers, and all orders.

[Post App](#) [[Git](#) | [Video](#)]

This project is a Post App that allows users to add or manage posts to it, and non-users can view others' posts. Use of React, Redux, and using JSON server to fetch data, and it won't lose data after reload, as data is being fetched from the JSON server and saved in Redux.

[E-Shop with JAM Stack](#) [[Video](#)]

E-Commerce Front End ([Git repo](#)). E-Shop Application is an online store to buy products. It is built using TypeScript, Next.js, and Tailwind CSS. *E-Commerce Back End* ([Git repo](#)). Product images are stored on Cloudinary for efficient cloud-based media management. It is built using Strapi, Cloudinary, and PostgreSQL.

SKILLS

Git
JavaScript
TypeScript
Node JS
React JS
Next JS
Redux
Express JS
HTML 5
CSS
TailwindCSS
Bootstrap
MongoDB
PostgreSQL
Debugging
Role-based
Routing
REST API

EDUCATION

Virtual University, Lahore—BSCS Degree

2019 – 2024

I Completed my BS in Computer Science. My final project was a JamStack e-commerce store built using TypeScript, Next.js, TailwindCSS, PostgreSQL, Cloudinary, and Strapi.

CERTIFICATES

Meta Front End Developer
Professional Certificate
